Melissa:

David Carr is the project manager for that part of the state and specifically for coal mining. I am copying him on this email so that he is aware of what is going on. The same day you called me he asked about this project so he will have the most up to date information. Attached you will find the information handed out during the pre-application meeting. Due to the size of the documents, I will have to send the photos in a follow up email. I only took a few photos and they are not all that good since we only looked at a cross section of the hundreds of acres of forested wetland out there. Mike Litwin with the USFWS-Bloomington Office may be a good person to coordinate with on this project. He has been working on this project forever.

Have a good one.
